USA Marvels
imovie

Objective: I can create an imovie using pictures, information, and maps to help my peers understand my USA Marvels state and marvel. I can demonstrate how to use apple t.v. and will share my creation with the class when I share my report and project.

Directions: Use the checklist below to help you search and save information to your camera roll on your ipad that have to do with your state and marvel you have picked. When you are finished, use your collected information to create an imovie or trailer on your ipad. Your movie may only be around 1 minute in length. All words MUST be spelled correctly. Use a dictionary or ask for help if needed. Make sure to capitalize proper nouns such as your state and marvel. Have FUN!!

There are resources on the weebly under the USA Marvels tab of websites that are kid friendly. You may use any informational book or social studies book to help you.

Checklist: (Actually put check marks when you have accomplished each task!)

- I have found at least 5 pictures that are about my **state**. (Could showcase the weather, transportation, land, capital, anything you think is interesting etc.)
- I have found at least 5 pictures that are about my **marvel**.
- I have included 1 picture/video of my state on the USA map. (You can save a map picture and highlight your state in type on pdf or take video of a you or a friend pointing to it on the big map in our classroom.)
- I have some how mentioned what region my state is located in. (You may write this, type this, or find a snapshot of it.) Make sure your region is the correct one from the weebly.
- I have included at least 1 picture/video of the **project** I have made.
- I have saved one blank spot on my imovie so I may add a picture of me from the USA Marvels Museum.

Now that you have all of your information, use the above pictures to tell a story about your state and your marvel through an imovie. You may pick any theme of an imovie that you want. Make sure you mention the **name of your state** and the **name of your marvel** in your imovie. Remember to start big (state) and zoom in (to your marvel.) All text that you add MUST be spelled correctly. Have fun and be creative.
